

RODMAN, Marvyn Floyd ("Rod") [UNTD YORK '43 O-63187] (1920 - 1999) Age: 79

Marvyn Rodman died suddenly in North Vancouver on October 18, 1999, at the age of 79.

He was attested into the UNTD at U of T in November, 1943. A native of Uxbridge, ON, he graduated as a Civil Engineer in the Spring of 1944, with the intention of joining the Navy. He'd had an array of jobs prior to and during his U of T years which saw him mining gold in Kirkland Lake, as well as stints ranging from South America to Baffin Island.

He did join the Navy and as of the summer of 1945 was a Temp SLT(SB)(E) attached to SCOTIAN.

There is very little subsequent information to be found. In 1987 he received a Citizenship Award from the Ontario Professional Engineers Association.

Regards,

Bill C
